

PRESS RELEASE

The foremost European provider of private ambulance and fire-fighting services and the foremost Spanish industrial fire-fighting provider establish a strategic alliance.

FALCK AND THE DOMINGUIS GROUP ESTABLISH A STRATEGIC ALLIANCE TO FURTHER DEVELOP THE BUSINESS OPPORTUNITIES OF LAINSA SERVICIOS CONTRA INCENDIOS S.A.

Valencia/ Copenhagen, 27 March 2007.

The FALCK Group, based in Copenhagen, Denmark, with a work force of more than 13,000 employees and an annual turnover of more than EURm 720 in roadside assistance, health care services, private ambulance and fire-fighting services and also in training for fire-fighting, emergencies and evacuation has signed a strategic alliance with the Valencian based DOMINGUIS GROUP to further develop and explore the business opportunities of LAINSA Servicios Contra Incendios S.A. ("LAINSA SCI") The DOMINGUIS GROUP provides industrial cleaning, decommissioning, decontamination, surface treatment, corrosion protection and fire fighting/prevention services, among others, to the Spanish nuclear, petrochemical and energy sector and has a turnover of app. EURm 45 and 800 employees.

LAINSA SCI is the foremost Spanish industrial fire fighting company with revenue of app. EURm 9. The company's clients include the main Spanish electricity, gas and industrial companies.

The DOMINGUIS GROUP knows that in a globalised economy such as the present one, it is essential to join synergies and work for joint objectives. Therefore the DOMINGUIS GROUP has put the advantages to be obtained by its alliance with FALCK before continuing with LAINSA SCI on a solitary path. FALCK believes that a competent local partner is essential to exploit the group's services in the field of international firefighting and see the strategic alliance around LAINSA SCI as a well established platform to offer the groups services in Spain.

This strategic alliance will allow the services that LAINSA SCI is currently offering to all its clients to be complimented by other new services, such as: ambulance service, patient transport, emergency control centres, training in emergency management and crisis management, amongst others. Likewise it is the ambition of THE DOMINGUIS GROUP and FALCK to expand the services of LAINSA SCI to Southern Europe and Latin America.

The current management of LAINSA SCI will continue as managers in this new phase and the company will continue to operate under the LAINSA SCI name. The objectives of LAINSA SCI will still be excellence in management and client care.
